

Files & Folders Backup Report

Cove Backup Activity Report

The backup Activity Report provides a comprehensive list of all backup operations performed for resources of the workloads configured in the organizations. It gives insights into the status of each backup job run for each resource, based on which you can perform analysis and take corrective actions.

- Total Successful
The number of backup jobs processed successfully without errors.
- Total Failed
The number of backup jobs failed for the resources.
- Total In-Queue
The number of backup jobs that are waiting to be processed.

Colors are used to indicate certain aspects. Typically, in reports, color coding may be used to convey different statuses, levels of urgency, or types of data.

- **Green** indicates that the backup was successful or that everything is functioning properly. Represents “Completed”
- **Orange** signifies a warning or an issue that requires attention but isn't critical. Represents “Completed with Errors”
- **Red** denotes a critical error or failure that needs immediate action. Represents “Unsuccessful”
- **White** indicates that there is "No backups”.
- **Yellow** indicates that a backup is scheduled or in progress but has not yet been completed. Represents “In Process”.

BACKUP STATUS	
No Backups	
Completed	
Completed With Errors	
In Process	
Unsuccessful	

The color palette represents the backup status of the specific device over the last 28 days.

Backup Failures and Reasons:

The list of devices below has experienced backup failures due to various reasons. As part of our process, we are retaining the backups of these offline devices for a period of 60 days. This retention period allows us to restore the backups if necessary, during this time. After the 90-day period, we will remove these devices from the Cove Backup Manager to prevent further backup attempts or unnecessary storage usage.

Hostname	Type	Description	Last Seen
AFA-LT-0F3BF8F2	Laptop	Iskandar Rios New Hire	2025-10-27

Devices Pending Installation on Cove Backup Manager: Exclusions and Updates:

The list of devices below is excluded from the Cove Backup Manager for various reasons, as outlined. These devices are not currently installed on the Cove Backup Manager. Some of these devices have been offline for over a month, while others are spare devices that have not yet been added to Cove. Despite this, we are actively monitoring these devices and will install them on the Cove Backup Manager if necessary, in the future.
