# Cove Backup Activity Report

The backup Activity Report provides a comprehensive list of all backup operations performed for resources of the workloads configured in the organizations. It gives insights into the status of each backup job run for each resource, based on which you can perform analysis and take corrective actions.

- Total Successful

  The number of backup jobs processed successfully without errors.

- Total Failed

  The number of backup jobs failed for the resources.
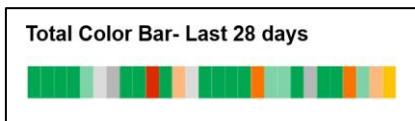

- Total In-Queue

  The number of backup jobs that are waiting to be processed.

Colors are used to indicate certain aspects. Typically, in reports, color coding may be used to convey different statuses, levels of urgency, or types of data.

- **Green** indicates that the backup was successful or that everything is functioning properly. Represents "Completed"

- **Orange** signifies a warning or an issue that requires attention but isn't critical. Represents "Completed with Errors"

- **Red** denotes a critical error or failure that needs immediate action. Represents "Unsuccessful"

- **White** indicates that there is "No backups".

- **Yellow** indicates that a backup is scheduled or in progress but has not yet been completed. Represents "In Process".

BACKUP STATUS	
No Backups	
Completed	
Completed With Errors	
In Process	
Unsuccessful	

Total Color Bar- Last 28 days

The color palette represents the backup status of the specific device over the last 28 days.
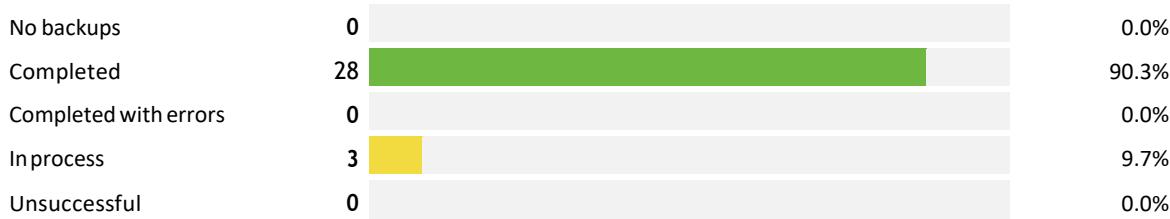

BACKUP & RECOVERY

OVERVIEW
Customer	Altera Fund Advisors	**Devices**	31
Servers	1	**Used storage**	14.8 TB
Workstations	30	**Selected size**	5.39 TB

BACKUP STATUS

No backups	0		0.0%
Completed	28		90.3%
Completed with errors	0		0.0%
In process	3		9.7%
Unsuccessful	0		0.0%

Backup Failures and Reasons:

The list of devices below has experienced backup failures due to various reasons. As part of our process, <u>we are retaining the backups of these offline devices for a period of 60 days</u>. This retention period allows us to restore the backups if necessary, during this time. After the 90-day period, we will remove these devices from the Cove Backup Manager to prevent further backup attempts or unnecessary storage usage.
